Class I

Product Description

Glare-free LED bollard available with or without a motion detector or a presence detector, for an average installation distance of +/- 6m, this is an interesting and economical solution for many outdoor installations. Its high level of vandal-proof protection and very wide beam of light thanks to its asymmetrical lens make it an ideal choice for highlighting sites without disrupting their layout. Sampa PRO is a bollard with a sober, timeless design, particularly suited to your urban and architectural projects.
